Backcut Anchor System

## Glass in all its Clarity

Flat front surfaces, precise workmanship and optical clarity are fundamental properties, which make glass configurations so appealing. Ipafix, the Backcut Anchor System from Interpane offers new solutions for all Flat Glass and their processing.

## High-Precision and Flexibility

The ipafix Anchor System sets new standards in glass processing.

Point-fix holders can be easily and quickly applied, with bored holes of only 8mm diameter. The fixed anchors in backcut holes, engaged in the sub-construction, are

adjustable in all directions, and offer the highest in installation ease. Rubber buffers add to the gripping effect of the anchor system. The glass surface itself has no appreciable pressure exerted upon it.

## One Solution for many Applications

Whether Facades, Interior Glazing, Partition Walls, Overhead Glazing, Sanitary Areas, or Interior Fitouts – with ipafix, successful designs with barely visible technical workmanship are achieved. Minimalism with maximum performance!

## Overview of Advantages

- maximum transparency for all glass surfaces
- easy-to-clean outer surfaces
- no glass through-cuts, preventing thermal breakage
- no breakage of laminated glass surfaces, caused by pre-stressing
- easy installation with aluminum profile systems for interiors.
- Barely visible fixation system
- Applicable in architectural lighting

DIMENSION IN SPACE

Unser Partner für Hinterschnittanker-Systeme

## Technical Data

- available as tempered, heat-strengthened, and laminated glass
- max. glass surface 1800 x 3600mm
- min. glass surface 300 x 500mm
- minimum glass thickness 8mm
- fewer point-fix anchors in one glass element
- sub-structure qualities for facades, walls, and overhead applications
- functions as fixation in commercial quality profile systems
- fixed to primary and secondary seals in edge-applications

## Applications

- Facades
- Insulating Glass Windows
- Partition Walls
- Interior Wall systems
- Overhead Glazing
- Sanitary Areas
- Shower Stalls
- Interior Fixtures
